The floor – the business card of any building

...

There is really no need for old, unsightly and worn floors. They do not have to be replaced at great expense of time and money either. Nor do they need to be thoroughly cleaned and polished at frequent intervals, as this leads to repeated service interruptions, and generates recurring costs.

Our sustainable and durable solution for flooring exposed to heavy foot traffic is WEARMAX[®] Ceramic Coating.

Extends the service life of existing flooring

WEARMAX[®] Ceramic Coating is the perfect solution for significantly extending the service life of new or worn flooring. 120 million ceramic particles per square metre ensure maximum abrasion resistance, and provide your floor with optimum long-lasting protection.

1. High performance floor sealant with 120 million ceramic particles!

Welcome to the world of WEARMAX[®] Ceramic Coating

...

The unique technology of WEARMAX[®] Ceramic Coating anchors 120 million ceramic particles per square metre suspended on the surface in a flexible coating system. When it is applied, a wafer-thin layer of ceramic, invisible to the naked eye, is deposited simultaneously. This protects the floor highly effectively against wear marks, abrasion and soiling, and improves slip resistance.

The floor sealant can be applied to resilient floor coverings such as PVC, vinyl and linoleum floors, synthetic and natural rubber coverings as well as to wood and parquet floors. In areas subjected to heavy foot traffic, our floor sealant is the solution to many usage problems and provides optimum long-term protection against signs of wear.

Floors showing signs of severe wear and tear regain their attractiveness, and abrasion and the formation of scuff marks are largely prevented. As less dirt adheres, floors can be kept clean with minimum effort and maintenance cleaning is considerably reduced, thus not only saving you money but also protecting the environment.

Our innovative system is maintenance-free as there is no need for re-coating. WEARMAX[®] Ceramic Coating generates surfaces that are highly abrasion-resistant and largely impervious to disinfectants and chemicals*.

* Please ask for our positive list of disinfectants.

WEARMAX[®] Ceramic Matrix

Profit from the benefits!

- Largely resistant to disinfectants*
- The service life of existing, heavily worn floors is significantly extended
- Long-term protection against wear and tear, abrasion and signs of use
- Increased scratch resistance of the surface finish
- Improvement of the slip resistance rating
- Minimal resoiling
- Economical and environmentally friendly
- NO periodic deep cleaning or recoating

„Our Colour System is ideal for giving
 heavily worn resilient flooring a completely new look.“

This is how it works with
 the Floor Configurator!

A new look for old flooring

WEARMAX[®] COLOUR creates **visual highlights** and guarantees an entirely new look on top of existing resilient floor coverings – an individual solution to meet your needs perfectly.

The all-round solution

WEARMAX[®] TRANSPARENT can be used, thanks to its outstanding technical properties, on almost any surface including **plastic/PVC, linoleum, synthetic rubber and natural rubber floor coverings** as well as **wood and parquet flooring**.

„Our Transparent System is ideal for renovating badly worn floors. Restores the original appearance of wood or resilient flooring.“

Commercial facilities

Shops, fitness studios, cafés, ...

Healthcare facilities

Hospitals, nursing & old people's homes, ...

Offices

Bureaux, showrooms, co-working spaces, ...

WEARMAX[®] Ceramic Coating in action

WEARMAX[®] Ceramic Coating is the ideal solution for particularly heavily frequented areas in public facilities.

In **hospitals, and nursing and retirement homes**, WEARMAX[®] Ceramic Coating protects existing floors just as efficiently as in **retail facilities, offices or schools**.

Public institutions

Administrative offices, universities, schools & playchools, ...

Time and cost savings

WEARMAX[®] Ceramic Coating saves time and costs even during application thanks to minimal service interruptions. This also applies to the daily maintenance cleaning.

Cost savings

When renovating with WEARMAX[®] Ceramic Coating, it is not necessary to replace the old floor covering. With our system, you can expect the highest level of abrasion resistance plus an extended service life due to the unique ceramic technology. There is also no need for repeated deep cleaning and recoating operations. As a result, the environment is protected since fewer cleaning agents and auxiliary materials are required.

Time savings

A major advantage of WEARMAX[®] Ceramic Coating are the minimal service interruptions. There is no need for periodic deep cleaning, recoating or conditioning, making the coated floor maintenance-free. As resoiling is minimised, the cleaning process – whether manual or mechanical – is greatly simplified and polishing is unnecessary.

OVERVIEW
...

120 million ceramic particles per m²

ensure maximum abrasion resistance and optimum long-term protection of your floor.

Do not overcoat

Ensure that you do not cover the features and positive properties of WEARMAX[®] Coating with cleaning agents.

Easy-to-clean technology

WEARMAX[®] Coating reduces dirt adhesion. This benefits cleaning operations and minimises the consumption of cleaning agents.

Time-saving

WEARMAX[®] Coating results in minimal service interruptions. Periodic deep cleaning, recoating or conditioning are a thing of the past, making the floor maintenance-free.

Cost-saving

There is no need to replace the old floor covering. Our system guarantees maximum abrasion resistance and thus an extended service life thanks to the unique ceramic technology.

Environmentally friendly

As no new floor covering is required, tonnes of waste are saved. Repeated deep cleaning and recoating are also unnecessary. The resultant need for fewer cleaning agents helps to protect the environment.

80 per cent

of our WEARMAX[®] projects are concerned with the particularly demanding education and health sectors.
